PILGRIM PROJECTS

effective affective Voices Patient reflective

Digital storyboard

Please use this storyboard to help plan your story. In each of the boxes, note or sketch the kind of image you envisage. Think especially about what you want the viewer to see as the opening image and what will be the last thing they see as the story ends.

Underneath each box, please write the first few words of the sentence that will accompany the image.

Before you finish, please indicate what style of music you might like to use for your story (i.e. classical, jazz, rock, guitar, orchestral, etc), and suggest a title for your story.
